

Complete Advanced Space-saving and Quick Change Water Filtration System

- High Quality 0.5 Micron Multistage Filtration
- Super High Flow Rate
- Unbeatable Filter Performance
- NSF Certified
- Commercial Grade Filter
- Different Tap and Faucet Options
- Easy Do It Yourself Installation
- 10 Year Warranty
- National Service & Support Network
- Free Cartridge Reminders
- Ideal for Renters - connects under sink to existing tap. Can be relocated as needed

Reduces or removes:

-  Sediment, Rust
-  Chlorine, Chloramines, Pesticides, Herbicides, Insecticides, Asbestos, THM's, VOC's, Lead, Sulphides and Manganese
-  Colour, Taste & Odour
-  Cryptosporidium & Giardia, Bacteria, Algae, Fungi

Perfect for stone or marble benchtops or under-mount sinks.

Perfect for home, office, commercial kitchen, caravan or RV.

Why People Choose the QC350

The QC 350 can be connected to the current kitchen tap or to a separate filtered water tap. It can also be connected to appliances like coffee machines, fridges and dishwashers among others.

This is a commercial grade system that has a higher performance than any other similar system on the market.

Easy DIY Installation

All fittings, parts and step by step install guide are included with the system in the box. All you need is an adjustable spanner. Or, call 1300 661 735 and we can arrange to fit it for you for a low fixed price.

No need to drill holes in stone bench tops or stainless steel sinks, the QC350 connects directly to the existing sink flick mixer tap and can be installed vertically or horizontally. Filter dimensions: 35cm high x 13cm wide x 13cm deep.

Multi-Stage Filtration

This all in one sediment and carbon filter has multiple filtration stages. Several layers of fine sediment removal media protect the activated carbon core, making it great for drinking, cooking, washing fruit and vegetables or preparing baby formulas.

Unbeatable Filter Performance

The QC350 lasts up to 10 times longer and removes up to 14 times more than common carbon block filters with a rated capacity of over 56,000 litres.

This market leading filtration system removes/ reduces sediment, rust, chlorine, chloramines, colour, taste, odour, pesticides, herbicides, THM's, VOC's, cryptosporidium, Giardia, insecticides, asbestos, bacteria, algae, fungi, lead, oxidised iron, sulphides and manganese.

Connection is Your Choice

The QC350 has different kits available; under sink connection to existing flick mixer tap, connection to new separate faucet (QC 350-E) or full plumbing kit for connection to copper pipe (QC 350-P).

Lowest Cost per Litre

Only 0.2 cents per litre filtered. It is so affordable you can share it with the pets and plants too.

Easy Quick Change Cartridge Design

Easy to do, DIY - no spanners and no mess. Best of all a 12 month cartridge life with free filter change reminder service.

NSF Certified

This filter has been fully tested and certified NSF/ANSI Standard 42 and 53 to give you and your family the best confidence and quality in water filtration.

Super High Flow Rate

At 8.5 litres per minute you can fill cooking pots, kettles and the sink just as fast as you could without a water filter.

Made in the USA

The QC350 offers quality and affordability whilst being made to meet the strict guidelines of the USA, UK & Australia.
