

# UltraTap

Filtered Boiling, Chilled  
or Hot Water Instantly

A single attractive benchtop font delivers filtered boiling or chilled water for beverages, and the underbench boiler can also deliver hot washing water to your existing faucet.

A range of capacities, compact footprint, smart design that reduces **energy consumption** and **minimises maintenance**, **ease of use** and **user health benefits** make the Ultra Tap your first choice of office kitchen water delivery system.

**Lowest maintenance** of any  
boiling + chilled system on the market

**7 Year Warranty**

Wide range of configurations  
for all building and office sizes

### Smart design increases reliability, reduces maintenance, lowers costs

- No solenoids, level sensors or pumps make this simple and exceptionally reliable boiling and chilled drinking water supply a very low maintenance option.
- UltraTap filter cartridges require changing only once every 12 months, and the filters can be fully recycled.

### Energy efficient, cheap to run

- The system costs **less than \$1.50 per week** to operate without water drawoff, based on a 12 hour operating cycle per day, 5 days a week
- The additional power cost of boiling filtered water is less than 0.5 cents per cup. The additional cost of chilled filtered water is less than 0.2 cents per cup.

### Safe and easy to use

- Safety lock options prevent the accidental dispensing of boiling water.
- Easy to operate levers control the flow rate.

### A system that promotes health for users, and is easy to keep healthy

- The UltraTap water filter is independently certified to remove up to 99.9% of chlorine, chloramines, cryptosporidium, giardia, asbestos, colour, taste and odour and other chemicals. Hard water protection comes standard with all UltraTap filters.
- Changing the sanitary quick change cartridge is as easy and fast as changing a light bulb.

## Other Key Features

#### System capacity

Available system options for **staffing of between 1-160**  
 Boiling water delivery from **110-260 cups per hour**
